

Collexis BiomedExperts.com Achieves 200,000 Registered Users

BiomedExperts.com Fast Becoming The Definitive Social Media Site for Life Science Researchers.

COLUMBIA, S.C. – (August 19, 2009) – Collexis Holdings, Inc. (OTCBB: CLXS), a leading developer of semantic technology and knowledge discovery software, announced today that their life science research portal www.BiomedExperts.com has surpassed the 200,000 registered user mark .

“Achieving 200,000 registered users in less than 18 months is very positive and we expect that the fall research season will continue to allow BiomedExperts to grow at a healthy pace,” stated Bill Kirkland, CEO of Collexis. “We are very excited about our latest partnership with the American Institute of Physics and the pending publishing partnerships that are on the horizon. Further our plans to launch additional functionality over the course of the year will only enhance BiomedExpert’s position in the life science industry.”

“We continue to hear great things about BiomedExperts from the life science community,” states Dr. Christian Herzog, M.D., Managing Director for Collexis STM markets. “BiomedExperts has established itself as the social media tool for life science researchers to be seen and to find new collaborators.”

Pre-populated with over 1.8 million Pub-Med-based expert profiles, BiomedExperts allows scientists and researchers to directly connect with and explore their own professional contacts, grow their networks and identify researchers with the expertise needed for future collaborations. Through user-friendly search interfaces, potential research collaborators can share data and collaborate with professionals from more than 1,800 organizations and institutions from 137 countries, totaling more than 30 million connections made through the site.

About Collexis Holdings, Inc.

Collexis Holdings, Inc., a leading developer of semantic technology and knowledge discovery software is headquartered in Columbia, South Carolina (USA) with operations in Cincinnati, Ohio, Cologne, Germany and Valparaiso, Chile. Collexis now offers the world’s first pre-populated scientific social network for life science researchers, www.biomedexperts.com. Collexis’ proprietary technology builds conceptual profiles of text, called Fingerprints, from documents, Websites, emails and other digitized content and matches them with a comprehensive list of pre-defined “fingerprinted” concepts to make research results more relevant and efficient. This matching of concepts eliminates the ambiguity and lack of priority associated with word searches. The results are often described as “finding needles in many haystacks.” Through this novel approach, Collexis can build unique applications to search, index and aggregate information as well as prioritize, trend and predict data based on sources in multiple industries without the limitations of language or dialect. Collexis’ current clients in the public, private and academic sectors include the Mayo Clinic; Johns Hopkins University; Dana-Farber Cancer Institute, the University of California, San Francisco; the University of South Carolina; Erasmus University Library; Bristol-Myers Squibb; Lockheed Martin; the World Health Organization; Wellcome Trust; the National Institutes of Health; and the U.S. Department of Defense. Shares of Collexis common stock are traded under the symbol CLXS on the OTC Bulletin Board (OTC BB). For more information, visit www.collexis.com.

Forward-Looking Statements

Some of the statements made in this press release may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are

based on management's current expectations and include known and unknown risks, uncertainties and other factors, many of which the company is unable to predict or control, that may cause the company's actual results or performance to differ materially from any future results or performance expressed or implied by such forward-looking statements. These statements involve risks and uncertainties, including risks and uncertainties associated with BiomedExperts.com. These risks and uncertainties are in addition to other factors detailed from time to time in the company's filings with the SEC, including the section entitled "Risk Factors" in its transition report on Form 10-K for the period ended June 30, 2008.
